# ARNAUD DÉCOLASSE

## SENIOR ENGINEERING MANAGER

Following a Master's degree in computer science, I now have 15 years of experience as a software engineer. I worked in companies of various sizes and domains, in France and in the United States. After being a full-stack developer for about 10 years, working mostly on back-end side, I progressively grew into leadership roles, first on technical side, then as people manager. I eventually reached a Senior Engineering Manager level at Expedia Group. I oversaw teams up to ten people, mostly developers but also project and product managers, organized in agile teams relying on devOps workflows and tools.

## EXPERIENCE

**Senior Engineering Manager**
2021-2023

*Traveldoo, Expedia Group | Paris*
During my last couple years at Traveldoo, I was promoted to Senior Engineering Manager in charge of the administration and implementation applications. I supervised around ten direct reports of various skills, in a business termination context that made motivation a challenging topic. I organized the work streams so we could keep on providing great product quality and support to our customers, while offering career opportunities to my team members.

**Engineering Manager**
2018 - 2021

*Traveldoo, Expedia Group | Paris*
Leader of the 5 people team developing the Expense product at Traveldoo. As manager, I organized the work processes using Agile and Kanban, and coached my direct reports in their career progression. I handled the COVID situation with the challenging situations of full-remote and financial restrictions (hiring freeze, contractors termination). I also managed several freelance developers inside the team.

**Full-Stack Developer**
2015 - 2018

*Traveldoo, Expedia Group | Paris*
Senior Software Engineer in the agile development team for the Expense product. I worked on all layers of the application: back-end, front-end, batch. I progressively took a technical leadership role contributing on the new microservices architecture and the Ci/Cd migration.

**Integration Developer**
2013 - 2015

*Sefas USA, Groupe Docapost | Boston*
Software engineer on ADF (Automated Document Factory) technologies. Product customization for the customers' needs. Creation of workflows to handle documents creation, merging, processing, printing and mailing. Python and Java languages.

**Full-Stack Developer**
2011 - 2013

*Bouygues Telecom | Paris*
Software Engineer on a middle-office application (Gallium) managing millions of mobile phone's clients and contracts. Conception and development leader on new versions, quality and assurance tests, support and bug fixes on the production version.
Java and Flex technologies.

## EDUCATION

**MASTER'S DEGREE, Computer Science**
2006 - 2008

*Université Paris Cité*
*Grade: "Mention Bien", Option: Information Systems*

**BACHELOR'S DEGREE, Computer Science**
2005 - 2006

*Université Paris Sorbonne*
